Subject: Microsoft Settlement

I am requesting that the Department of Justice settle the Microsoft case under the terms of the original antitrust case. As a public school educator employed in a low income area, it would be a windfall for the underprivileged children in the district to have the use of computers and software. These are children that will NEVER have the opportunity again. I beg you to open the door to these deserving children. Without the funds to further their education, a computer background would at least give them skills that can be used in obtaining employment.

The government has spent enough of our tax money trying to cripple an American business. Enough is enough.

Thank you for listening.

Priscilla Meyer
